# **Kills 99,9% of all virus and bacteria in minutes**

GoCharge Healthcare Cleaning Stations are the turning point for your school, business, institution or organization.

The cleaning stations break chains of infection everywhere and break them in just minutes.

You can easily and quickly create a safe working environment in schools, nursing homes, hospitals and institutions, as well as in any office, and in all modern companies, where a large number of objects frequently change hands.

Our special UVC light can effectively disinfect items that are difficult to clean and, e.g. does not tolerate water, soap or alcohol, but where you still want an infection-free surface.

Items include computers, mice, keyboards, writing tools, books, mobile phones, tablets, headsets, keys, toys, board games, tools, glasses, robots – and many, many more.

## One cleaning station – five benefits

GC Healthcare Cleaning Stations come with several built-in benefits for you, your employees and your company:

- 1.**  
Create a safe and infection-free work environment
- 2.**  
Charges all rechargeable electronics, including phones, computers and robots
- 3.**  
Avoid wear and tear on all objects when disinfecting them
- 4.**  
Reduce extra costs for chemicals, water consumption and energy
- 5.**  
Stations lock to keep items safe

## Together, we can limit the spread

All institutions have been particularly vulnerable throughout the Corona pandemic and will continue to be so for a long time to come. We must do our utmost to take care of each other in this new reality, but to do so on the Corona pandemic terms, is both time-consuming and exhausting for everyone.

GoCharge Cleaning Stations uses a special UVC light, which effectively kills viruses and bacteria, including the Coronavirus, with a documented effect of 99.67%.

The GoCharge Cleaning Stations are already in use in several offices – public and private, in nursing homes, schools, and many other places.

The stations provide both a safer everyday life and more time to take care of those who need you the most.

# An environmentally friendly solution

All cleaning stations are environmentally friendly solutions that use electricity only when used, which means zero cost of standby power.

GoCharge Healthcare Cleaning Stations comes in a variety of different sizes:

*Model 30L*

*Model 10L*
